

COVID 19 Vaccine Update

Loudoun Internal Medicine Associates strongly recommends patients be vaccinated as appropriate against COVID-19 virus when the vaccine is available. Loudoun Internal Medicine does not currently have the vaccine. When we are able to offer the vaccine, we will send an email and update the website with scheduling information. If you would like to discuss specific vaccine related concerns, please schedule a telemedicine visit with your provider.

For commonly asked questions, who should be vaccinated and contraindications to the vaccine, please visit the following websites:
